SUMMARY

Social Media Manager with hands-on experience managing US sports (NBA) and Indian football content across digital platforms. Skilled in real-time matchday execution, audience engagement, and platform-native storytelling, with the ability to adapt strategies across global and regional audiences. Experienced in handling fast-paced workflows, delivering timely content, and translating live sports moments into engaging narratives.

TECHNICAL SKILLS

SOCIAL MEDIA & CONTENT

- Content Planning & Scheduling
- Matchday Content Execution
- Social Media Strategy
- Audience Engagement & Community Management
- Trend Analysis & Real-time Content

CREATIVE AND DESIGNS

- Infographic Design
- Visual Storytelling
- Short-form Content Ideation
- Canva / Adobe Photoshop

TOOLS & TECHNOLOGIES

- Instagram, X, Facebook
- Meta Business Suite
- Content Scheduling Tools

WORK EXPERIENCES

- SOCIAL MEDIA MANAGER (SPORTSKEEDA)**

May 2023 = Oct 2025

 - Coordinated content scheduling and ensured timely delivery across digital platforms.
 - Maintained quality standards and professional communication in fast-paced environments.
 - Managed operational workflows to meet strict deadlines and performance benchmarks.
 - Collaborated with cross-functional teams to ensure smooth content execution.
- SOCIAL MEDIA MANAGER (OFFICIAL FANS CLUB - MBSG)**

April 2024 - Aug 2025

 - Ideated and executed engaging social media posts as a **freelance contributor**, aligned with matchdays and fan sentiment
 - Designed visually compelling infographics to enhance content appeal and shareability
 - Independently led the #MBCat10 campaign, ensuring consistent storytelling and audience engagement
 - Curated trend-driven content by tracking real-time conversations and adapting platform-specific formats

DATA ANALYTICS & MODELING PROJECTS

Aurum AI – Gold Price Trend Analysis & Prediction

DEC - 2025

- Developed an end-to-end time-series forecasting system for gold prices using deep learning models (LSTM and GRU).
- Cleaned, preprocessed, and structured historical gold futures data using Python, Pandas, and Scikit-learn.
- Engineered technical features and implemented sliding-window-based supervised learning for sequential prediction.
- Trained and evaluated models using MAE, RMSE, and directional accuracy to assess both numerical precision and trend correctness.
- Implemented recursive multi-step forecasting logic and persisted trained models and preprocessing artifacts for reproducible inference.
- Built interactive visualizations to compare historical prices with model forecasts and support analytical interpretation.
- Tools: Python, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, Jupyter

Team Control Index (TCI) – Cricket Analytics Framework

JAN - 2026

- Worked on the Team Control Index (TCI), a data-driven analytical framework designed to evaluate team control and behavioural stability under pressure in competitive cricket.
- Analysed match data to compare volatility, pressure response, and close-match outcomes between champion and non-champion teams.
- Contributed to insights showing that championship success correlates more strongly with control under chaos than peak performance.
- Translated quantitative findings into structured analytical narratives suitable for strategic interpretation.

EDUCATION

- **BACHELORS OF COMPUTER APPLICATION**

Sept. 2021 - June 2024

Techno Main Salt Lake, MAKAUT

- DGPA: 8.4

- **HIGHER SECONDARY EXAMINATION**

March 2020

St. Joseph Convent High School, CBSE

- Standard Percentage: 57.5%

- **SECONDARY EXAMINATION**

March 2018

St. Joseph Convent Higher Secondary School, ICSE

- Standard Percentage: 85.2%

PROJECTS & EXPERIENCE

Database Developer (Medicine Delivery System)

Jan 2024 -June 2024

- Designed and managed structured databases using MySQL to ensure efficient data storage.
- Performed system updates and monitored data accuracy for smooth operational flow.
- Generated reports supporting backend operations and system monitoring.
- Ensured compliance with data handling best practices.

Backend Developer (PayRoll Management System)

July 2023 - Dec 2023

- Supported administrative backend processes through structured system design.
- Processed and managed payroll data using Oracle database systems.
- Assisted in generating structured reports and maintaining data integrity.
- Ensured system processes aligned with procedural guideline

ADDITIONAL INFORMATION

- **Languages:** Bengali, English, Hindi
- **Shift Flexibility:** Comfortable with Sports Industry Timings and Schedules
- **Availability:** Jan 2026
